STAT

NOTE FOR:

FROM:

SUBJECT:

1. Vault is blessed.
2. I am arranging for clearances for [ ] so that he will be available for our project-- [ ] wants to followup on this.  
10:30 Wed.
3. You have an appointment at 1:00 with [ ] to discuss revisions of the Investment Council chapter. The most important revisions for Turner involve:
  - explaining relationship to RMS (how an extension; how a means of underlining RMS authority and get Community coordination)
  - outlining relationship to NFIB
  - why we need costing capability (We should decide if we are willing to push for this with Turner.)
4. We also might ask Mike to clarify what incentives are built in to force council decisions by given dates and to make the Community regard them as permanent.
5. Other points can be made to Turner in a memo from you which would cover the revised draft:
  - how the range of DCI options is constrained by present system ( [ ] work can provide examples.)
  - how investment council could avoid some of the problems of OSARS Steering Group

-- reasons for wanting to avoid return to EXCOM--and fact that option is being discussed in the Community.

6. Mike can make revisions in about a week. I think that would be good timing.

7.  will be sending us a proposal for another study. You should not discuss that with Mike. Such discussion would preclude us from entertaining a sole source contract.
